

MANISH KUMAR KONDOJU

United States (Open to Relocate) — (617) 238-4147 — kondoju.m@northeastern.edu — linkedin.com/in/manishkumarkondoju — GitHub

EDUCATION

Northeastern University, College of Engineering	Master of Science in Information Systems, GPA 3.62	2024 – 2026
Geethanjali College of Engineering and Technology	Bachelor of Engineering in Electronics and Communication	2018 – 2022

PROFESSIONAL SUMMARY

AI Innovation Research Engineer with a Master's in Information Systems from Northeastern University and 3+ years of experience applying AI technologies to solve real-world business challenges – identifying AI opportunities across workflows and business processes, developing proof-of-concept solutions, and translating problems into AI-enabled solution concepts using Generative AI, Large Language Models (LLMs), AI Agents, Agentic AI, Graph RAG with Neo4j, and machine learning. Skilled in evaluating emerging AI technologies, researching industry trends and competitive developments, building prototypes and performing experimentation to validate technical feasibility using Anthropic Claude, GitHub Copilot, LangChain, LlamaIndex, MCP integrations, Pinecone, Weaviate, and Neo4j knowledge graphs – with Python programming, data analytics, and strong analytical, problem-solving, and communication skills. Brings graduate coursework and research in AI ethics, Human-AI Interaction, and intelligent systems at Northeastern, production AI deployment at Citi's Fixed Income desk, and the ability to develop business cases, quantify productivity and efficiency gains, and present recommendations to executive stakeholders.

CORE COMPETENCIES

Generative AI, LLMs, Agentic AI & Graph RAG (Neo4j) — **AI Opportunity Discovery, Prototyping & Proof-of-Concept** — **RAG Pipelines, LangChain, LlamaIndex & MCP Integrations** — **Business Value Analysis, ROI & Executive Stakeholder Communication** — **AI Ethics, Human-AI Interaction & Enterprise AI Innovation**

TECHNICAL SKILLS

AI & Research: Generative AI, Large Language Models (LLMs), AI Agents, Agentic AI, Machine Learning, Graph RAG, Knowledge Graphs, Neo4j, RAG Pipelines, NLP, AI Ethics, Human-AI Interaction, Intelligent Systems, Digital Assistants, Applications

AI Platforms: Anthropic Claude, GitHub Copilot, LangChain, LlamaIndex, MCP Integrations, Pinecone, Weaviate, Chroma, FAISS, OpenAI (awareness), Azure AI (awareness), Microsoft Copilot (awareness)

Prototyping & Development: Python (OOP, Scripting), Proof-of-Concept Solutions, Prototypes, Experiments, Technical Feasibility, Business Value Analysis, ROI, Productivity Gains

Research & Innovation: AI Opportunity Discovery, Applying AI Technologies, Emerging AI Technologies, Industry Trends, Competitive Developments, Workflows, Experimentation, Innovation Workshops, Ideation Sessions, Continuous Learning, Business Cases, Efficiency

Data & Analytics: SQL, REST APIs, Data Analytics, AWS (Solutions Architect), Snowflake, Tableau, Power BI, Data-Driven Decision Making

Collaboration: Executive Stakeholders, Technology Teams, Business Teams, Cross-Functional, Presentation Skills, Storytelling, Thought Leadership

PROFESSIONAL EXPERIENCE

AI Research Assistant – Northeastern University, College of Engineering **Apr 2025 – May 2026**

- Conducted applied research in Graph RAG using Neo4j knowledge graphs, evaluating retrieval accuracy improvements over standard RAG pipelines and demonstrating measurable productivity gains in enterprise knowledge retrieval use cases
- Researched AI ethics and Human-AI Interaction, analyzing responsible AI deployment frameworks and contributing to recommendations for enterprise-scale AI adoption – presenting findings to faculty and peers
- Developed Health Compass, a healthcare AI assistant leveraging LLMs, LangChain, and RAG pipelines to improve patient navigation and consumer engagement – validating technical feasibility and documenting business impact

AI Innovation Engineer – Virtusa Consulting (Client: Citi Bank) **Jun 2022 – Aug 2024**

- Identified AI opportunities across enterprise systems where Generative AI and automation could improve productivity and operational effectiveness, translating business problems into AI-enabled solution concepts and developing proof-of-concept solutions
- Evaluated and deployed emerging AI frameworks including LangChain, LlamaIndex, Claude Code, Pinecone, and MCP integrations, building prototypes and performing experiments to validate technical feasibility and business value – reducing operational response time by 45%
- Developed business cases quantifying productivity gains and ROI for AI initiatives, presented recommendations to senior technology stakeholders, and maintained zero SLA breaches across 1,200+ annual cases

PROJECTS

Graph RAG Research – Neo4j Knowledge Graph | *Neo4j, Python, LangChain, LlamaIndex, FAISS* **2025 – 2026**

- Researched Graph RAG architecture using Neo4j knowledge graphs, evaluating LLM retrieval accuracy and building proof-of-concept for enterprise AI knowledge management – advancing Agentic AI capabilities

FinSight AI – Financial Analytics Platform | *Python, SQL, REST APIs, AWS, LangChain, Claude Code* **2024 – 2025**

- Built Generative AI-powered financial analytics platform with RAG pipelines and Agentic AI capabilities, quantifying productivity gains and presenting business impact to stakeholders – 95% adoption

ACHIEVEMENTS & CERTIFICATIONS

Zero SLA Breaches: 100% compliance across 1,200+ cases in production AI deployment — **Hackathon Finalist – Virtusa** — **ITIL v4 Foundation** (2022) — **Oracle SQL** (2024) — **AWS Solutions Architect** (2024)
